

Email 2/3/2016 to Participate.Metro@mwrrg.vic.gov.au

I can confirm that the City of Casey Council adopted the submission at its meeting on 1 March 2016 with one correction in the comments for Priority 10 being the insertion of “not” in the sentence “*eg Casey does **not** consider bin colour alignment as a priority.*” This was omitted in the original submission – my apologies.

In the discussion two further issues were noted.

- State Government should adequately resource delivery of the strategy through the approximately \$170 million dollars collected from the landfill levy each year including more than \$3.5 million from Casey ratepayers.
- The State Government should adequately plan for Prescribed Industrial Waste rather than continue to rely on Lyndhurst Landfill as the only licenced site.

Regards,

Michael Jansen
