

Submission on the draft MWRRIP

From: Judith Schmidt

One of my greatest concerns is the over packaging of food and goods. Also the excessive amount of clothing which people are led to believe they need. Most of this stuff already looks shabby before it's even worn. Op shops are jammed with clothes which will soon go to land fill. The proliferation of \$2 shops full of junk is also adding to wastage of non renewable resources. We just don't need all this clutter.

Pre packaged foods are a waste of resources. We need a shift in the way people think. There are a huge number of obese people consuming excessive amounts of resources.
